

Archana Shukla

Engineering Director | Enterprise Platform & Product Strategy | \$900M+ Growth Impact | GenAI Scale

Bangalore, India | +91 9880077251 | arc.shukla@gmail.com | [linkedin.com/in/archana-shukla-b5639411](https://www.linkedin.com/in/archana-shukla-b5639411)

Personal Agent - https://huggingface.co/spaces/arcshukla/profile_agent

EXECUTIVE SUMMARY

- Built and operated **mission-critical enterprise platforms with 99.99% reliability**, backed by disciplined execution and **25+ years of engineering leadership**.
- Delivered **\$900M+ business impact within one year** by reducing customer onboarding time by **75%** and deploying **production GenAI workflows** with measurable ROI in six months.
- Scaled and led **300+ engineers across geographies**, translating complex platform strategies into **customer-facing, revenue-impacting systems**.
- Architected **high-scale, failure-tolerant distributed systems** with **self-healing and auto-recovery with kafka**, built from scratch at **Maersk Project Logistics**, ensuring end-to-end platform resilience.

CORE SKILLS & IMPACTS

- **Grew global engineering organizations from 5 to 78+ engineers in 8 months** to strengthen leadership pipelines and instill high levels of execution ownership.
- **Directed multi-year enterprise platform strategies** across cloud-native architectures and developer enablement programs to secure long-term delivery excellence.
- **Optimized portfolio-level OpEx/CapEx and vendor strategies** to align technology investments directly with multi-million dollar business outcomes.
- **Partnered with C-suite executives through OKRs and QBRs** to drive rigorous portfolio alignment and delivery accountability for global operations.
- **Pioneered talent transformation programs**, including **QA-to-Dev transitions** to drive execution excellence across complex, multi-geography environments.

PROFESSIONAL EXPERIENCE

A.P. Moller Maersk | Bangalore, India | May 2020 – Dec 2025

Head of Engineering (Engineering Director) – Maersk Project Logistics | Dec 2024 – Dec 2025

- Defined and executed a **0 to 1 platform strategy**, scaling Project Logistics into an enterprise-grade product and improving operator productivity by **35%**.
- Reduced customer onboarding from **12 weeks to 3 weeks** using **event-driven architecture (Kafka)** and reusable frameworks.
- Delivered AI-driven workflows reducing shipment creation time from **30 minutes to under 1 minute**.
- Built reusable event, notification, and domain-configuration frameworks improving developer efficiency and system reliability.

Director Software Engineering – Supply Chain Management Platform | Mar 2022 – Dec 2024

- Led a **300+ member organization** across multiple supply-chain domains, aligning engineering execution with business growth.

- Improved delivery speed by **50%** through cloud-native Azure architectures and early GenAI adoption.
- Architected platform frameworks spanning alerts, communications, operational finance, UI foundations, and platform messaging, improving NPS by **18%**.
- Drove leadership development and inclusion initiatives strengthening long-term talent pipelines.

General Manager Engineering – Order Handling Platform - Export & Import | May 2020 – Feb 2022

- Modernized high-volume import/export systems, migrating legacy platforms to **Azure cloud-native architectures**, improving reliability by **15%**.
 - Represented Maersk at **DCSA**, influencing global shipping data and integration standards.
 - Built high-performing teams to address global scale and data complexity.
-

Instart Technologies (Akamai) | Bangalore, India | May 2019 – May 2020

Senior Director & Site Head

- Led a **250+ engineer global site** across platform, infrastructure, and operations.
 - Modernized edge-cloud infrastructure across **16K+ servers**, delivering **99.9% availability** for enterprise customers.
 - Managed engineering strategy and delivery governance during **Akamai acquisition integration**.
-

Oracle Corporation | Bangalore, India | Nov 2003 – May 2019

Director Product Development – Oracle Public Cloud (LBaaS) | Oct 2018 – May 2019

- Owned engineering and reliability for next-generation **Load Balancing as a Service**, supporting enterprise-scale customers.
- Delivered **99.99% availability** through platform modernization and API migrations.

Senior Development Manager – Oracle Public Cloud (LBaaS) | Nov 2014 – Oct 2018

- Built and scaled LBaaS from inception, growing global teams and securing **4 U.S. Patents** for role-driven notification systems.
- Reduced operational overhead by **45%** through automated patching and incident-resolution frameworks.

Product Development Manager – Oracle Public Cloud (SDI) | Nov 2010 – Nov 2014

- Built the **Software Deployment Interface (SDI)** from scratch with 30+ engineers, forming the foundation for standardized cloud provisioning.
- Led global delivery for data-center deployments with high provisioning stability.

Senior Software Engineer – Beehive, Appliance Platforms | Nov 2003 – Nov 2010

- Built configuration-driven frameworks reducing environment setup from **days to hours**.
 - Mentored engineers and authored platform standards for secure inter-service communication.
-

EARLY CAREER

- Lead Software Developer | Kanrad Technologies | Bangalore, India | Jan 2001 – Nov 2003
 - Senior Software Engineer | Xerox India | Delhi, India | Oct 2000 – Dec 2000
 - Software Engineer | Divas Software | Delhi, India | May 1999 – Oct 2000
-

PATENTS, AWARDS & INNOVATION

- Inventor on **4 U.S. Patents** for **role-driven notification and communication systems** used in **high-scale, event-based distributed platforms** and **OPC SaaS/PaaS provisioning**.
 - Winner of **Maersk Codethon** for delivering the first reusable **RAG based AI chatbot platform** for logistics automation.
 - Architected **production GenAI systems** - “AI-based email-to-API transformation” and “**secure natural language query analytics**”.
 - Crafted & delivered award industry first winning products **industry-first SSDO automation(Import) and BOL issuance(Export)**, eliminating **thousands of manual processing hours**.
 - Built configuration-driven frameworks reducing schema and API onboarding from **days to hours**.
 - Developed and launched a **RAG-based GenAI personal profile agent** on Hugging Face, allowing stakeholders to interact with my professional data through a secure, natural-language interface.

-

ENTERPRISE INFLUENCE & INCLUSION

- Mentored and sponsored women leaders through **RISE @ Maersk**, strengthening leadership pipelines.
 - Served on the **POSH Internal Committee**, contributing to governance and inclusive workplace practices.
 - Represented engineering leadership as a **SheLovesData panelist** and host of **CodeCargo**, Maersk’s flagship engineering event.
 - **4.7/5** rated mentor in **GeeksForGeeks** on Softskills in professional eco-system.
-

TECHNOLOGY

- Cloud: Azure, OCI, AWS, Kubernetes, Terraform
 - Distributed Systems: Kafka, Event Hub, Microservices, NGINX
 - GenAI: LLM integration, RAG, semantic search, PageIndex
 - AI Tools: HuggingFace, Lovable, Vercel, n8n, Cursor, VsCode, Claude, github- copilot
 - Data & Observability: Oracle DB, NoSQL, Grafana, Prometheus, ELK
 - Languages: Java, Python, Perl, Shell, REST, CI/CD, DDD
-

EDUCATION

- Master of Computer Applications (MCA) – Uttar Pradesh Technical University | **1996 – 1999**
- Master of Science (Physics) – Kanpur University | **1994 – 1996**
